

COMMUNICATION-SCENARIO, STUDENT GUIDELINES

Target group: middle year and final year nursing or paramedic students, students of medical science

This scenario in part of studies:

- Patient safety in nursing care
- Emergency nursing care
- Examination and treatment of patient

How to study for a simulation:

- ISBAR (Identify, Situation, Background, Assessment, Recommendation)
- CRM (crew resource management) = non-technical skills (leadership, decision making, communication, team work)
- primary assessment (A,B,C = Airway, Breathing, Circulation)
- advanced patient assessment (A,B,C,D,E = Airway, Breathing, Circulation, Disability, Expose)

How to get ready for simulation-scenario-day:

Students

- have suitable clothes
- be there at time, those who are late can not take part in simulation

Simulation scenario-day:

- always remember confidentiality
- be active
- support other learners
- no rude comments
- **participants:** after scenario: no communication at the end of the scenario until everyone is ready for debriefing

Based on a work at <https://www.slipps.eu/>.

Observer-guideline:

- follow the scenario
- observation tool for observers: divide them up to three groups
- - predetermined learning objectives:
 - group 1: observe learning outcome: the students are able to do systematic examination of patient
 - group 2: : observe learning outcome: the students are able to evaluate status of the patient and make working diagnosis
 - group 3: : observe learning outcome: the students are able to give report on patient by using ISBAR

Remember, simulation is a good opportunity to learn in safe environment.

Do perform simulation case as good as if this is a real nursing situation.
